Findings

Same stroke order, same height (1.61-1.63 m) and the same slight leftward lean of the mouth at all four scenes. Painted with the fingers of a right hand wearing a glove (no prints). Details of the signature were never released to the press, which makes a copycat unlikely.

Only people with access to the sealed case file knew the stroke order. Scene 4 was marked before the file was shared outside the task force, which suggests the offender is the same person, or that someone with file access is leaking.
